

Adobe Systems Incorporated
Public Patent License
ISO 32000-1: 2008 – PDF 1.7

ISO 32000-1: 2008 – PDF 1.7 describes a computer file format used for information interchange among diverse products and applications on multiple platforms. Adobe owns patented technology disclosed in this international standard specification. We offer this patent license to all individuals and organizations in the world in order to encourage the implementation of this specification.

Public License

Adobe grants every individual and organization in the world the royalty-free right, under all Essential Claims that Adobe owns, to make, have made, use, sell, import and distribute Compliant Implementations. If a licensee brings (or participates directly or indirectly in the bringing of) a lawsuit or similar action against any other party claiming that a Compliant Implementation infringes an Essential Claim, Adobe may revoke the rights granted above to such licensee. Upon such revocation, such rights will be deemed to have never been granted.

No Warranty

Adobe disclaims all warranties, express and implied, with respect to the Specification and the license granted above, including warranties of title and non-infringement. Nothing in this document shall be construed as requiring the maintenance of any patent, a warranty or representation as to the validity or scope of any patent, an agreement to protect or cooperate with any party or to bring or prosecute actions against any party, or a grant of any right under any patent claim other than an Essential Claim.

Reservation of Rights

All rights not expressly granted herein are reserved.

Definitions

“**Compliant Implementation**” means the portion of an application, product, or service that reads, writes modifies or processes computer files compliant with the Specification.

“**Essential Claim**” means a claim of a patent, whenever and wherever issued, that is necessarily infringed in order to achieve compliance with the requirements of the Specification. A claim is necessarily infringed only when there is no reasonable way to avoid infringement of that claim when reading, writing, modifying or processing computer files compliant with the Specification.

“**Specification**” means ISO 32000-1:2008 – PDF 1.7 published by the International Organization for Standardization (ISO). By way of example only, any updated version of ISO 32000-1 and any specification that incorporates ISO 32000-1:2008 by reference is not the Specification for purposes of this license.
